

PIEGA connect Software V1.45

(06.2021)

The input source function can be changed over:

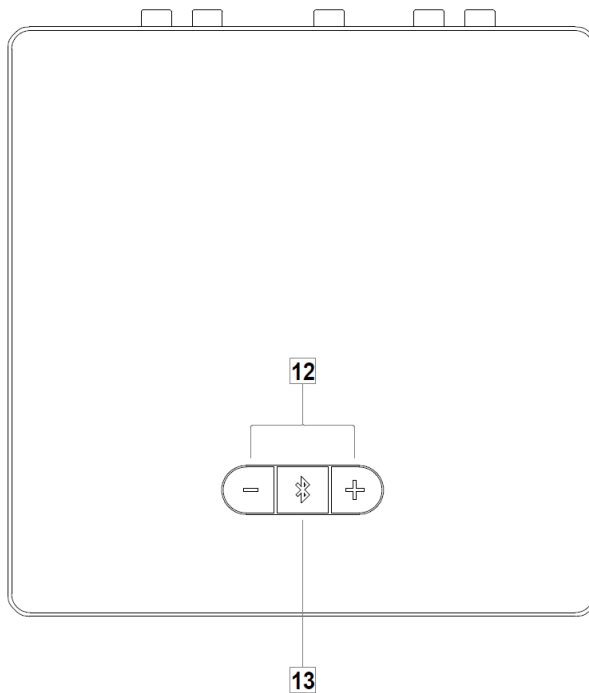

Automatic input selection (default)

All input sources are supported and will be played according to prioritization

Input fix

NEW the prioritization can be suppressed. Only the selected input is played.

Switching the input logic

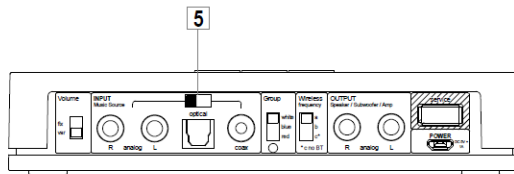

Press + / - key (12) simultaneously for more than 5sec.

Switching of the input logic is acknowledged by flashing of the keys (12).

Automatic input selection:

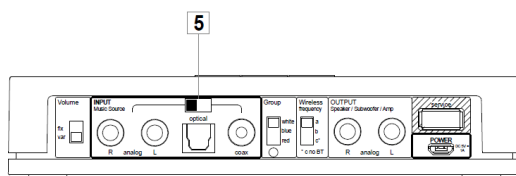

The PIEGA connect has various input sources (analog, optical, coax). The input sources can be preset or prioritized for the desired applications (setup with TV, subwoofer, network player, record player, etc.). It should be noted that Bluetooth always has the highest priority and therefore overrides all other sources.

5	Analog	Optical	Coax
	1	2	3
	3	1	2
	3	2	1

Input fix

Only one input is played. The corresponding input can be selected with the switch (5).

5	Analog	Optical	Coax
	ON	OFF	OFF
	OFF	ON	OFF
	OFF	OFF	ON
