PIEGA SUB MEDIUM

Our PIEGA sub medium is an ideal addition to the Ace Wireless loudspeaker series. It can be easily integrated into the Ace Wireless system or connected to any WiSA-enabled device (transmitter). Whether for your home cinema or stereo system – the Sub Medium impresses with a punchy and profound bass for suspenseful moments and a full blast of emotions. And with its modern design and high-end finish, it is also a visual highlight in any setting.

Naturally, the Sub Medium can also be connected via cable to any classic passive system and thus be combined with all PIEGA loudspeakers.

WHAT YOU CAN EXPECT:

- **QUALITY**
premium sound quality by PIEGA
- **DESIGN**
state-of-the-art aluminium subwoofer
- **PLUG & PLAY**
simple handling and operation
- **SURROUND**
top-class home cinema –
wireless multichannel system (up to 7.1)
- **TUNING**
DSP sound tuning
with dynamic loudness control

YOUR SUBWOOFER IN DETAIL

All PIEGA loudspeakers and subwoofers are designed and manufactured in Switzerland. Premium standards are our top priority, which is why we only use materials and components of the highest quality and the latest in electronics technology. The look of our Sub Medium was created by Swiss designer Stephan Hürlemann in close collaboration with PIEGA.

For our Sub Medium, we have created an all-aluminium cabinet for the first time in PIEGA history. The compact, rounded aluminium profile with only 230 mm diameter and the closed cabinet construction ensure incredibly precise bass reproduction in a small format. The two 8-inch drivers have been perfectly adapted to cabinet volume.

The Sub Medium uses the same digital filters and algorithms as the Ace Wireless series, which allows for linear bass reproduction over the entire range. Furthermore, the Sub Medium adjusts to the selected volume (dynamic loudness correction) and thus ensures thumping bass at all times.

COLOUR VARIANTS

The Sub Medium is available in silver, black anodised, or white lacquered finish. The black and silver models impress with a sandblasted surface for an innovative texture and feel that harmonises perfectly with the new, rounded and modern design.

TECHNICAL DATA

WIRED INPUTS

Analog RCA
Analog stereo balanced

WISA (WIRELESS)

Data rate 48 – 96kHz / 24Bit

POWER

Output power @<1% THD 240W
Output power @<10% THD 300W

FREQUENCY

Frequency response 18 – 160Hz

MECHANIC

Assembly 2 × 200 mm
Dimensions 230 × 270 × 465 mm
Weight 17.5 kg

SUPPLY

Voltage 100 – 240V 50/60Hz
